[Paris Founders Club × Notion]

Content on autopilot?

Build your AI content system in Notion, tonight.

Rama Logic

PARIS FOUNDERS CLUB

[tonight]

You leave with a system, not with notes.

[the goal]

Not an influencer. A content creator who wins clients.

~~influencer~~

Your life, your weekend, your audience. Attention is the goal.

content creator

Your ideas, your expertise, your product. New customers are the goal.

[the truth]

Most founders post when they find time. And it shows.

[the real problem]

You don't lack ideas. You lose them.

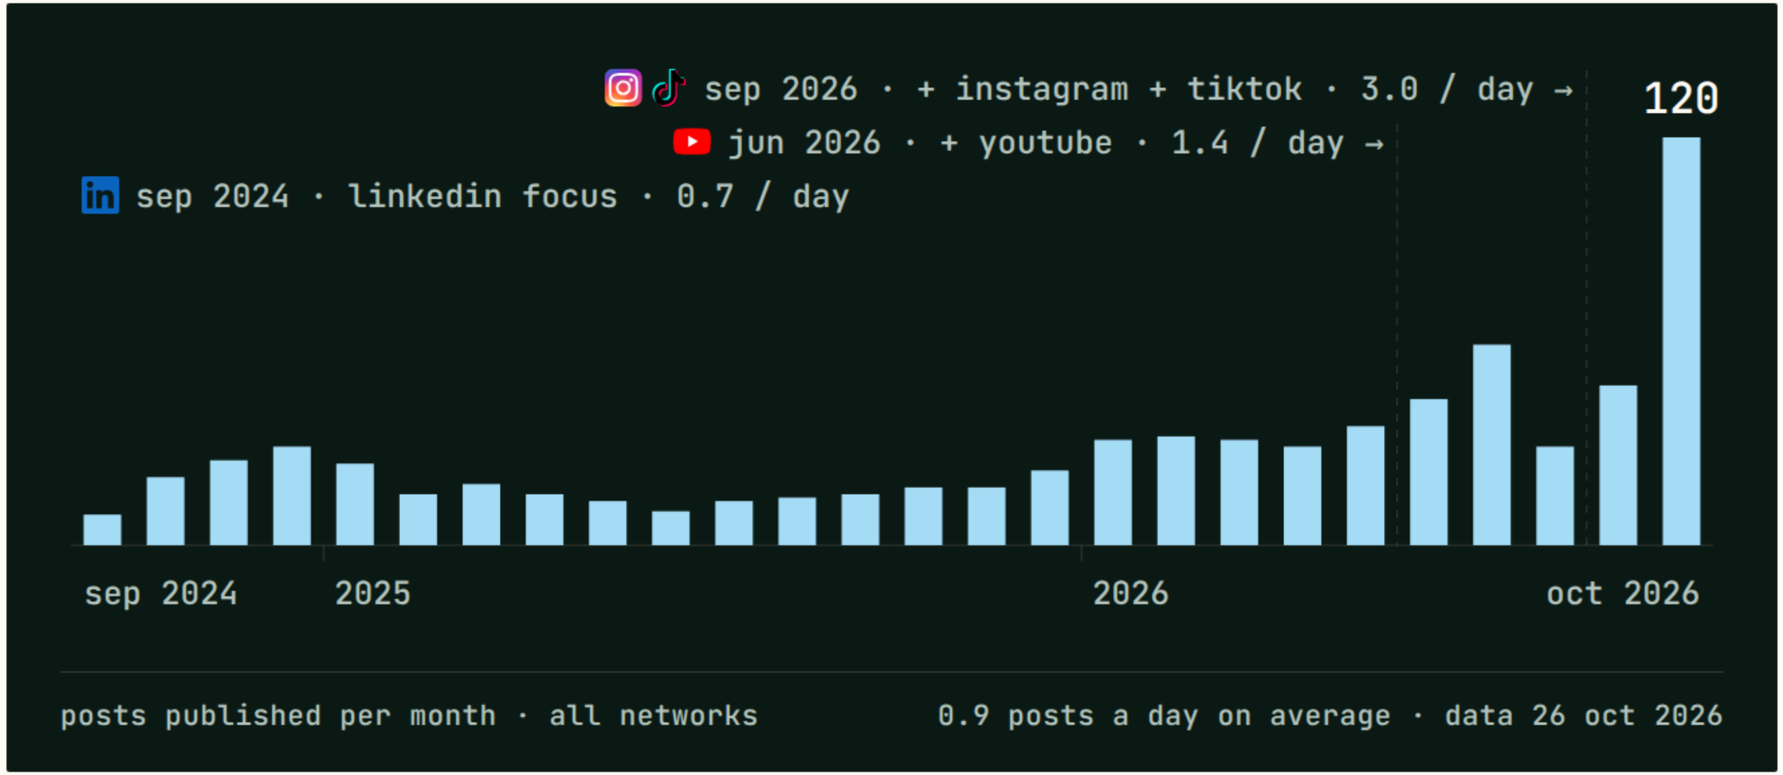

[hello]

I'm Sylvain. I build Notion and AI systems for founders.

[since september 2024]

732 posts published since September 2024.

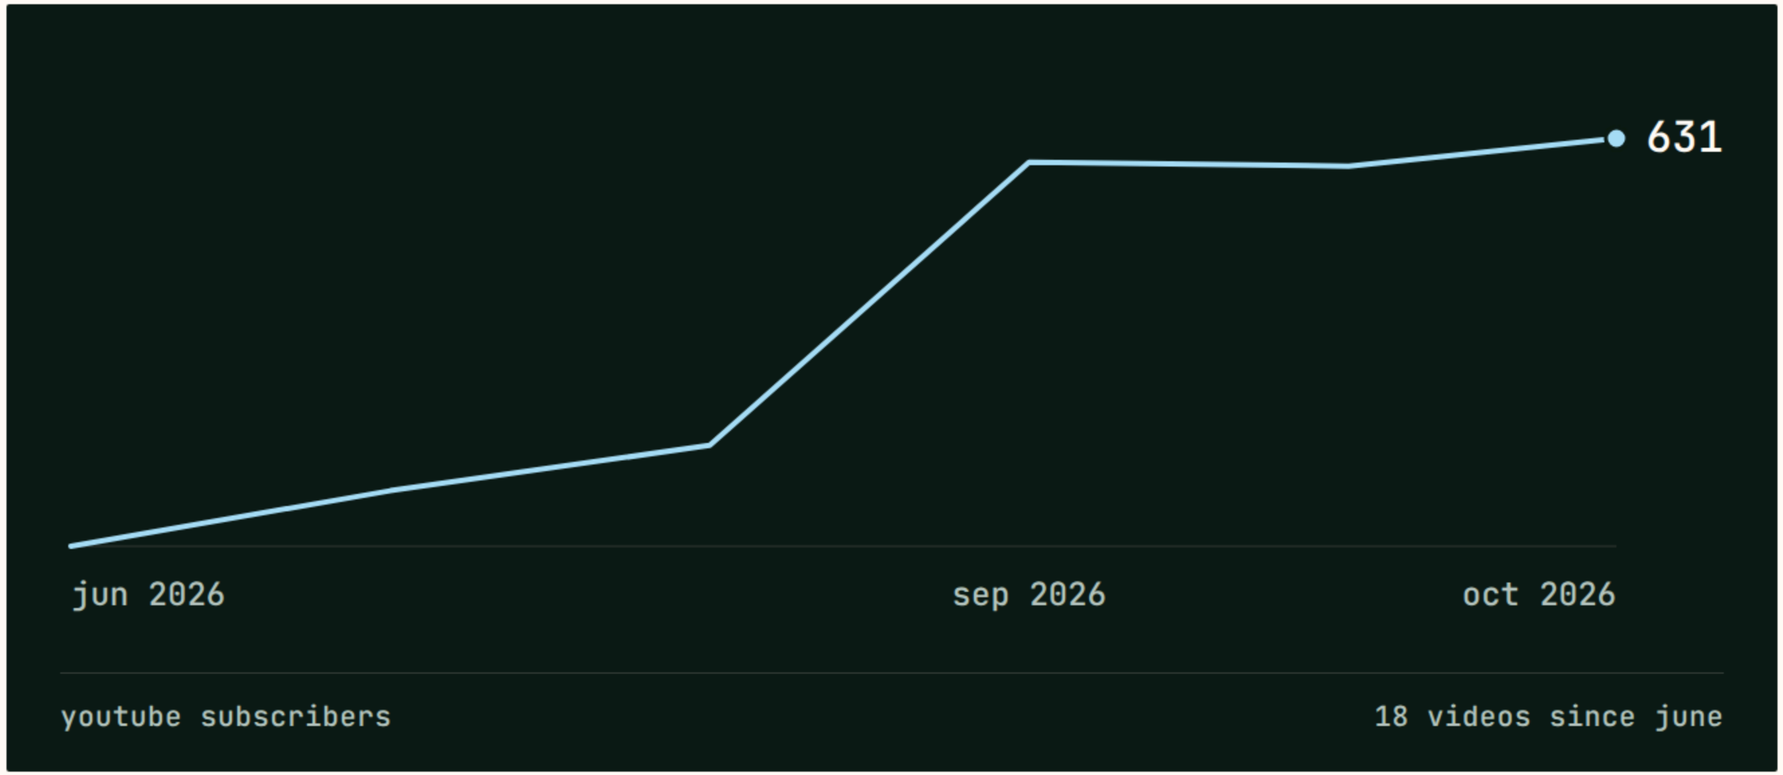

[linkedin]

1.2 million impressions on LinkedIn in 2025 and 2026.

1,219,074 impressions on posts published jan 2025 to oct 2026 · 9,705 followers

[youtube]

631 subscribers and 14.7k views on YouTube since June.

[newsletter]

709 people get my newsletter.

60% average open rate

[in public]

And I started Instagram from zero, in June.

53 posts · 17,719 views · 113 followers

[clients]

40 clients worked with me.

55 projects won · counted in my CRM on 30 oct 2026

[the strategy]

There is a strategy behind it. Not tonight's topic.

TOFU
top of the funnel

Broad content that speaks to everyone. For founders: mindset.

MOFU
middle of the funnel

Your market and your vertical: AI or SaaS news. Building a finance app? What the government is debating on finance right now.

BOFU
bottom of the funnel

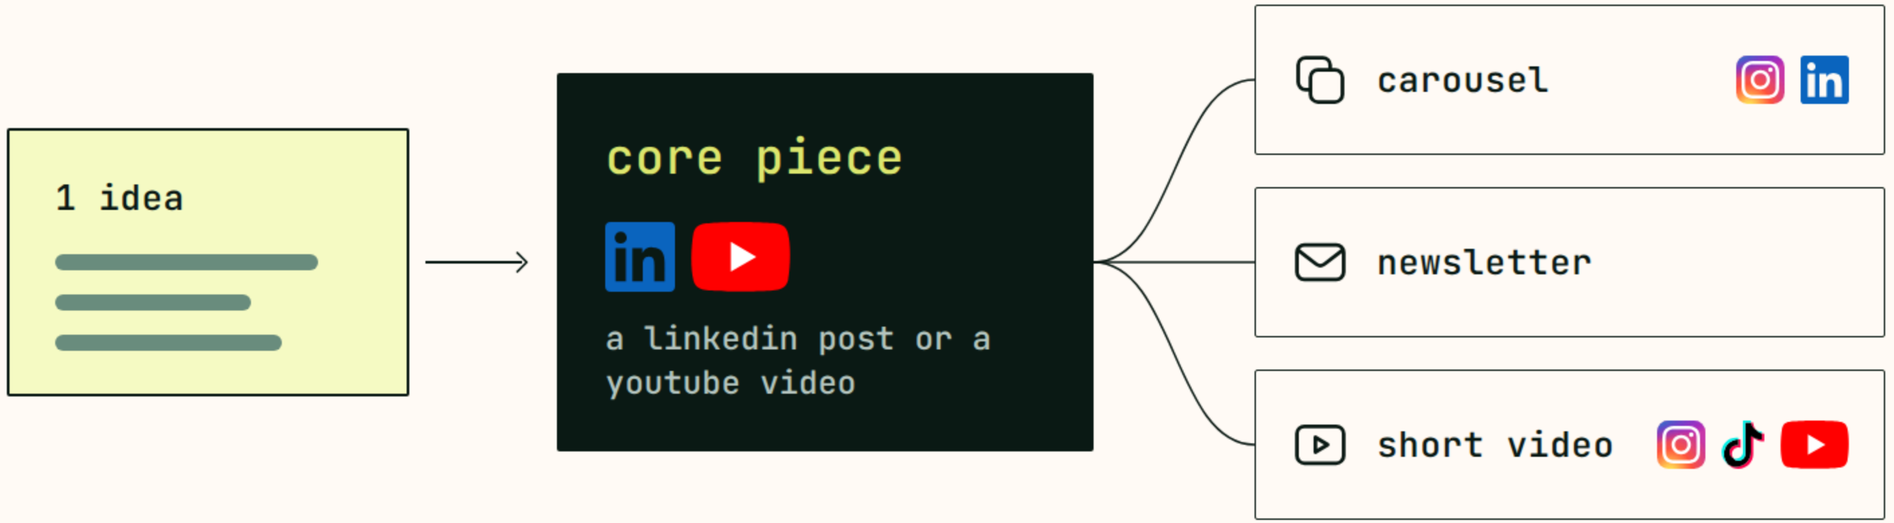

Your core expertise. And selling.

[the secret]

It's not discipline. It's a system.

[the system]

One idea. One core piece. Then every format.

[my workflow]

Every idea goes through the same four steps.

01

capture

Every day, ideas land in one database, Raw content: from a chat with Claude, from Notion, or typed in.

02

core piece

From one raw idea, one main piece: a LinkedIn post or a YouTube video.

03

cut it

Then one version per network: Instagram, TikTok, Shorts, the newsletter.

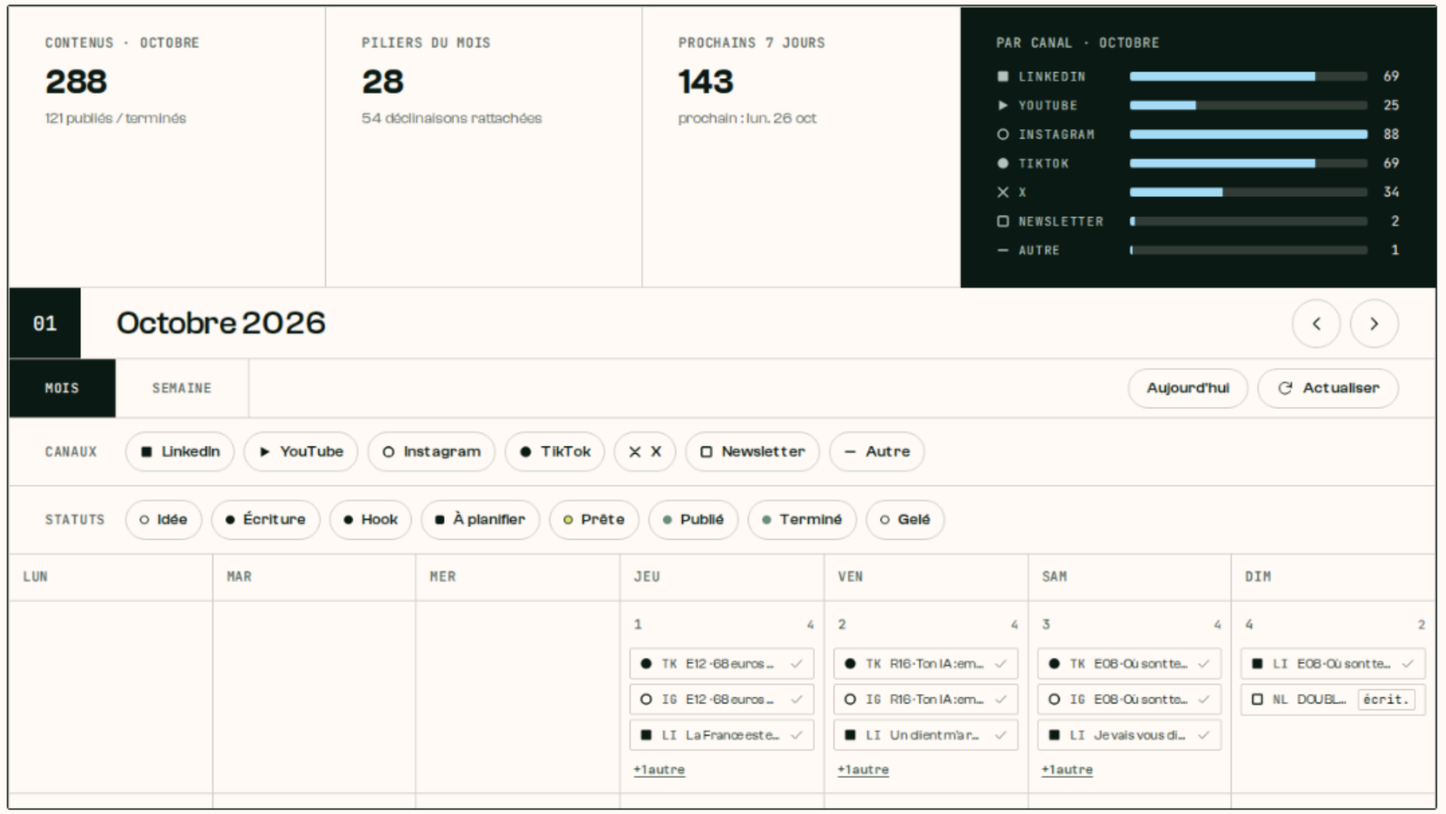

04

calendar

Each version gets a date. A last check, then it goes out.

[under the hood]

And it all lives in one Notion database.

[tonight's template]

You get the same flow tonight, in four pieces.

01

idea bank

One row per idea. Raw is fine: a title and three lines.

02

brand voice

One page on who you are. The AI reads it before it writes.

03

content agent

The prompt. One idea in, one core post, then three formats.

04

calendar

The same database, by date. You decide what goes out.

[what you need]

Notion and one AI. The rest can wait.

Notion	The idea bank, the brand voice, the calendar	required
Notion Agent or Claude	Writes the drafts in your voice	pick one
Canva	Designs the carousel	when you post it
Your phone	Films the short video	when you post it

[01 · idea bank]

Catch every idea before it disappears.

idea bank · one row per idea · brewly, fictional example

Idea	We cut our menu from 12 coffees to 3
Source	Customer conversation
Pillar	Building Brewly
Notes	A client told me: “My team drinks 3 of your 12 coffees. The rest goes stale in the cupboard.”
Status	Idea

[02 · brand voice]

Tell the AI who you are once.

brand voice · one page, read before every draft	
Who I am	Your company in one sentence, and why you started it
Who I write for	Their job, their team size, their problem
What I talk about	Three pillars
How I sound	Do and don't
Words	The ones you use, the ones you never use
Two posts I like	The AI copies the rhythm, not the words

[02 · no brand voice yet?]

No brand voice yet? Let the AI interview you.

the prompt · on the brand voice page of the template · 10 min

You help me write my Brand Voice page. I don't have one yet.

1. Ask me 6 questions, one at a time. Wait for each answer:
   what I do · who I write for · my 3 topics
   3 texts I wrote · 2 posts I like · words I never use
2. Describe my tone from MY texts, not from the posts I like.
3. Fill the page: who I am, who I write for, 3 pillars, do and don't, words.

Never invent a fact. One page max.

[03 · the agent]

One idea in. One core post. Three formats cut from it.

the prompt · on the content agent page of the template

```
Read my Brand Voice page, then the idea page.
STEP 1 · THE CORE PIECE
  LinkedIn post: hook under 12 words, 120 to 220 words.
STEP 2 · CUT IT INTO 3 FORMATS. Same facts, nothing new.
  Carousel: 6 to 8 slides · Newsletter: 150 to 200 words
  Short video: 30 to 45 s, hook in the first 3 seconds
Never invent a number. Write [check] when a fact is missing.
Never post anything.
```

[03 · the result]

The core post comes first. The rest is cut from it.

one idea, four drafts · brewly, fictional example	
LinkedIn post (core)	We cut our coffee menu from 12 to 3.
Carousel	Slide 1: We cut our coffee menu from 12 to 3. Here is why.
Newsletter	Subject: The day we cut 9 coffees from our menu
Short video	0 to 3 s: “We cut our coffee menu from 12 to 3.”

[04 · calendar]

Then you decide when it goes out.

status · the same database, four steps	
Idea	The agent has not run yet
Drafting	The agent wrote the drafts
Ready	You edited them and picked a date
Published	You posted it. The agent never does.

[live]

Watch: one idea, four formats, in under two minutes.

[two ways]

Notion Agent works inside Notion. Claude works next to you.

notion agent

claude

[the rule]

The AI drafts. You decide.

[your turn]

Let's build yours.

template

[step 1 · 2 min]

Duplicate the template.

top right of the template page · duplicate · pick your workspace

[step 2 · 5 min]

Fill your brand voice. Short and true beats long and vague.

[step 3 · 5 min]

Drop your 3 ideas in the idea bank.

[step 4 · 10 min]

Create your agent and paste the prompt.

[step 5 · 10 min]

Run it on one idea. Edit. Put it in the calendar.

[build time]

Raise your hand anytime.

35:00

[before friday]

Post one of tonight's drafts before Friday.

[keep going]

Keep the template. Get the next ideas in my newsletter.
